

# TAP **New York's Potential for Opportunity and Growth**

New York City is the fashion center of the world. And LIM College is the only college in the United States exclusively devoted to the study of business and fashion. Its traditional classroom setting and hand-on industry internships helped it earn recognition from the Princeton Review as one of the "Best Colleges in the Northeast."

**85%** of LIM College graduates from New York found permanent jobs in New York.

**84%** of its students residing in other states secured employment in New York and became state taxpayers.

New York's APC Colleges are committed to helping students realize two key goals: Obtaining a degree and a good job.

# TAP New York's Potential for Opportunity and Growth

- Higher Education is a vehicle for economic recovery.
- As one of the four pillars of higher education, New York State's proprietary colleges offer a focused entry point into the work force and a clear path to career opportunities.
- Our degree-granting colleges are regulated by the New York State Board of Regents and offer associate, bachelor's, master's, and doctoral programs
- Without the benefits of the Tuition Assistance Program (TAP) many of New York's neediest students may find their educational opportunities limited, and the emerging needs of New York State's employers and communities stifled.

**We urge Governor Cuomo and the Legislature to work together to restore TAP funding cuts and help New York's college students find opportunity, prosperity and economic growth!**
